METAL HOUSE FRONT BUMPER

The Metal House Front Bumper was engineered with the daring off-roader in mind. You'll enjoy easy recovery operations and rugged protection with this all-in-one Metal House Front Bumper.

MODEL - MHFT2

Standard Width Front Bumper
 Heavy Duty 3MM Steel Plate, 2" x 0.120" Tubing
 Premium Two Stage Textured Black Powder Coat Finish
 Bumper Weight - 13 Kg.
 1-Year Limited Manufacturers Warranty
 winch mounting facility
 Fits Thar CRDe & MM540/MM550/Thar DI

FRONT BUMPER WITH WINCH PLATE

BOLT-ON INSTALLATION.

The Metal House Front Bumper was smartly designed to be a direct bolt-on solution for Thar. As a direct fit replacement, this Metal House front bumper uses all factory mounting points and requires no additional cutting, welding, or fabrication for installation.

HEAVY DUTY CONSTRUCTION

Metal House Off-Road manufactures their Front Bumpers to precise specifications from 3MM thick mild steel plating and 2"x0.120" tubing for superior strength and rigidity. Metal House then completes their Bumpers in a two stage finish using epoxy pre-coating and high-grade textured black powder coating for long lasting durability.

FRONT BUMPER WITH LED

METAL HOUSE THAR REAR HEAVY DUTY BUMPER

The Metal House Rear Bumper was engineered with the daring off-roader in mind. You'll enjoy easy recovery operations and rugged protection with this all-in-one Metal House Rear Bumper.

LIGHT UP THE NIGHT

Light up The Night. The Metal House Bumper is the perfect solution for night-time trail runners, as it features two FyrFly LED Lights to ensure complete confidence in any night time adventure.

MODEL - MHRB

Standard Width Rear Bumper
Heavy Duty 3MM Steel Plate,
Premium Two Stage Textured Black Powder Coat Finish
Bumper Weight - 13 Kg.

EASY LOCKING SYSTEM

HEAVY DUTY ROCK GUARD/FOOT STEP (1 SET)

PACKAGE INCLUDE BOTH RIGHT AND LEFT SIDE ROCK GUARD (SET OF 2)

- One piece design
- Side girder system provides the ultimate protection for the sides and under section of your Mahindra Thar
- Provides protection and a step at the same time
- Bolts up without drilling or modifications to the vehicle Wheel to wheel for maximum protection
- Finished in the signature series Matte Black Textured Powder Coat

OFF-ROAD PROTECTION

Enjoy adventurous rides off road without worrying about the damages caused by rocky obstacles with Metal House rock guard. They also avoid large outcroppings with an addition of side hoops.

MODEL - MHRS

FEATURES: Step

COLOR: Black

MATERIAL: Steel

DURABLE CONSTRUCTION:

These Metal House rocker guards are made from heavy-duty 2" x 0.120" steel tubing. They feature textured black powder-coated finish with an E-coat undercoating to resist rust and corrosion. Their black finish matches perfectly with other factory original parts.

SPECIAL DESIGN:

Mahindra Thar rocker guards have a special frame mounted design to provide safe, bounce-free installation. This design also increase ground clearance by keeping the mounting points well above the frame.

FITMENT:

Metal House rocker guards are designed for Mahindra Thar.

35MM WHEEL SPACER (SET OF 2) FOR 160 PCD

Wheel spacers widen your car's wheelbase, improving grip, handling, and precision.

Made from a special aluminum alloy, Tusker wheel spacers are forged from an innovative process that produces a high strength-to-weight ratio. Each wheel spacer is then put through a CNC-machine to obtain an extremely flat surface. All wheel spacers are heat-treated to further increase strength and anodized to guarantee protection from oxidation.

MATERIAL - BILLET ALUMIUM

DIESELTRONIC FOR THAR CRDE OFF ROAD EDITION

OFF ROAD
DieselTRONIC

Wireless security-enabled remote to switch maps on the move

RACE dynamics

P2 – HIGHER POWER

Increase power and torque off-peak up to 40%, peak up to 30%.

P1 - POWER AND INCREASED MILEAGE

Increase mileage up to 25%.

Increase power and torque up to 15%.

Shift gears early

WHAT MAKES IT SPECIAL?

1. Designed, developed, manufactured and tuned in India
2. ADSL™ Adaptive Self Learning technology that optimizes maps based on driving style.
3. Patented Technology
4. Plug-in Connectors - no wires are tampered with
5. Water resistant
6. Automotive grade components and connectors
7. Universal application

OFF-ROAD SPECIFIC FEATURES

1. Higher performance in all modes
2. Suitable for Tarmac/Slush/Snow/River Crossing
3. Fully water proof enclosure
4. Remapped Crawler (E) mode for reduced turbo surge/flat torque curve
5. Patented ADSL technology optimizes engine response for both on-road and off-road driving
6. Shock proof
7. Water-resistant Automotive grade connectors

E – ECONOMY MAP

Increase mileage up to 40%.

Enhanced engine smoothness

Reduced turbo spike, more linear power delivery

S – STOCK MAP

Works just like original

DIESELTRONIC FOR THAR 2.5 CRDE

MODEL - RDDTT

PERFORMANCE AIRFILTERS FOR THAR CRDE

BMC air filters are designed to replace the original paper filters in the vehicle air-box.

**MODEL - BMCT****HIGHEST QUALITY**

The BMC air filter is composed of a metallic mesh containing an oiled multilayer cotton filtration material. This guarantees a high level of filtering efficiency and a limited loss of air pressure.

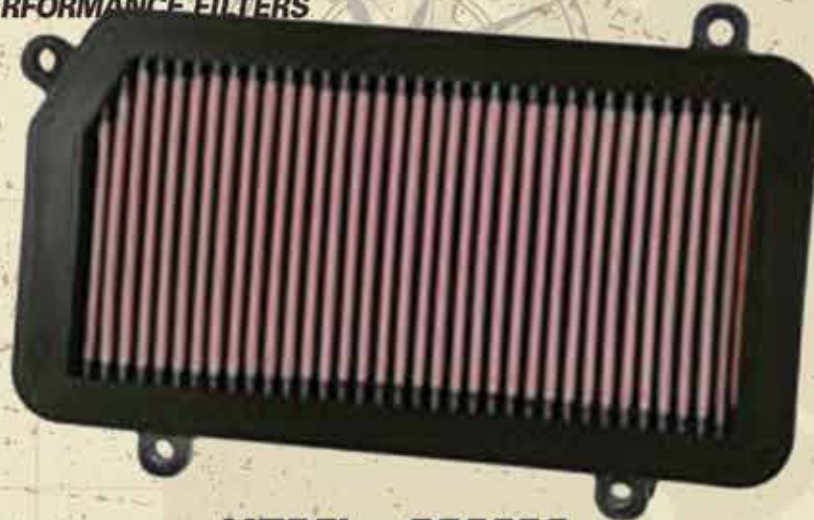

ECOLOGICAL AND ECONOMICAL

BMC air filters are made of cotton, a natural material which can be reused several times. The air filter can be washed with a special detergent then re-oiled, thereby saving the cost of changing the air filter each time the vehicle is serviced and thus reducing environmental waste.

RIGOROUS TESTING

BMC operates in a number of areas: automotive, racing, aerospace, nautical and industrial, and according to the specific regulations and requirements of each sector. Consequently, BMC air filter testing is rigorous and thorough thereby ensuring a higher quality in respect to paper, foam and plastic materials. The technical solutions used by BMC are derived from the results of a continuous and intense programme of laboratory testing. BMC carries out filtration tests in accordance with the international standards for filtering (ISO 5011). BMC Air Filters have a 98.5% filtering efficiency in respect to this standard.

AIRFILTER FOR THAR CRDE

MODEL - 332939

The Mahindra Scorpio is made in India, but its manufacturers are planning to bring it to the United States in the near future. The Scorpio is a complete SUV package, a cruiser designed to work well in the mountains and on the highway. K&N Engineering has designed a new replacement air filter (33-2939) for the 2005, 2006 and 2007 Mahindra Scorpio with a 2.4 liter diesel engine and 2.6 liter diesel engine.

After removing the stock air filter element and cleaning the inside of the air box, a K&N air filter is inserted into the air box. The provided metal inserts are then placed into the tabs of the K&N air filter. The provided washers and screws are then screwed back into the lid of the air box in place of the original air box hardware to ensure a secure fit.

K&N air filters are designed to increase horsepower and acceleration while providing excellent filtration. K&N air filters are washable, reusable and backed by the famous K&N Million Mile Limited Warranty. It will be the last air filter your vehicle will ever need.

K&N has been designing, manufacturing and enhancing high-flow air filters since 1969. We are a global corporation with more applications than any other manufacturer of similar products. We also invented the high flow category and the high flow technology that supports our products.
