## LESS POWER CONSUMPTION

The FRYFLY LED lights offer a tremendous reduction in load on your vehicles charging system, and provide a substantial increase in light efficiency. Drawing nearly 1/2 the power of a regular halogen/HID light, Tuff Stuff's LED Light Bar will not leave you dead in the night.

## NO TRAPPED LIGHT

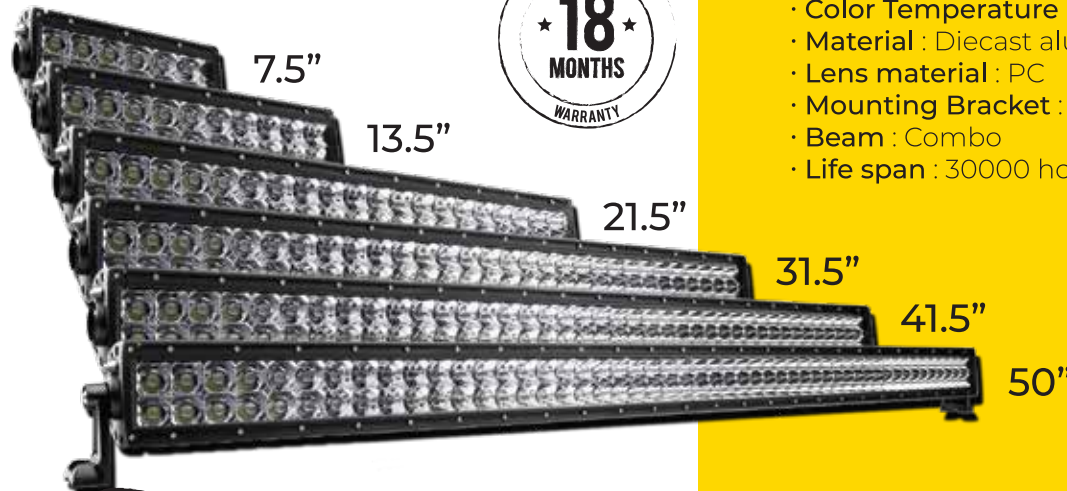

Traditionally, Halogen or HID bulbs bounce the light off of a reflector and sometimes pass through protective covers. Typically, 40% of the light output from the bulb does not reach its intended target, reducing brightness. Because there is no other way to bounce the light from a reflector on a halogen/HID, there is a dramatic reduction in light efficiency. With any protective cover/filter, you are also not allowing 100% of the light to pass through.

## NO BALLASTS

Ballasts burn out, and so do bulbs. Light Emiting Diodes will not!
